Introduction

Introducing the Multi-Purpose 3-in-1 Ozone Water Spray Sanitizer, a cutting-edge tool designed with veterinarians in mind, available at Regen03one Vet.

With a streamlined design, this device features a high-pressure spray nozzle making the sterilization of surfaces and equipment effortless.

The blue working indicator shows the operating status while the yellow indicates charging, ensuring you're always in control. Its touch switch and rechargeable battery complete with a USB cord provide up to 40 minutes of usage, aligning perfectly with our mission to promote effective integrative veterinary medicine through medical ozone therapy.

Elevate your practice with this technologically advanced, efficient sanitizer today. At Regen03one Vet, we prioritize effective integrative veterinary medicine, enhancing the well-being of all animals through advanced medical ozone therapy. Trust our innovative technology to provide a safer, cleaner environment for you and your pets.

Operating Instructions

High Pressure
Spray Nozzle

Slim Line Design

Operation Status
* Orange - Charging
* Blue - Operating

Power On/Off Switch

USB Charging Port

Press the power button to start the unit, indicated by the orange light. If no further actions are taken, the unit will automatically shut off after 10 seconds.

For ozone production:

Press the button a second time: The blue light will appear, and the machine will begin generating ozone gas for 2 minutes.

Press the button a third time: The purple light will activate, and the machine will produce ozone gas for 4 minutes.

To stop ozone production at any time, press the power button again to turn off the unit.
